

calREDD™ System Specifications

calREDD™ was designed to be accessible from any computer with access to the Internet. Optimum performance of calREDD™ functions may be achieved by confirming that a computer has adequate resources; the following guidelines are provided:

Minimum Requirements

- Minimum of at least 1 GB of RAM for Windows XP
- 2 GB for Vista and Windows 7
- Pentium4 3.06ghz or equivalent
- Adobe Flash Player current version
- Internet speed – 1 Mbit (128KB/s)

Recommended Requirements

- 2 GB or higher of RAM
- Dual Core processor (AMD or Intel)
- Adobe Flash Player current version (go to <http://get.adobe.com/flashplayer> to install or upgrade)

Testing Your Computer's Performance

An easy way to test your computer's performance is to go to YouTube.com and open one High-Definition YouTube video at full screen. If your computer can run the video, then your computer has adequate RAM.

The calREDD™ Call Center is available for assistance at **800-432-8822** or by e-mail at **techsupport@calredd.com**
