

## Pulling Up a Tax Map from Public Records

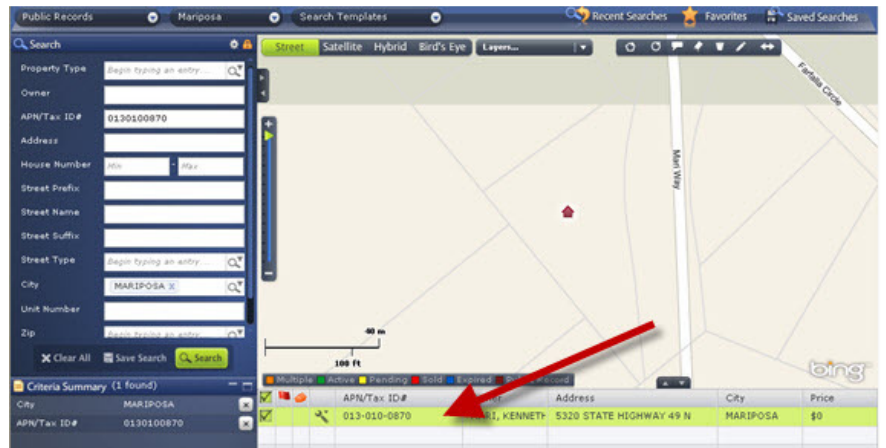

You can search for property tax records on calREDD™ through the tax program, **reInsight**, by clicking on **Search, New Search**, and then selecting **Tax Search**.

**Note:** You can also view tax records for a specific property that appears on the MLS by clicking on the **Tax Records** button, located in the lower left corner directly below the primary photo and thumbnail photos in **Detail View**.

Once inside the **reInsight** tax program, you can search for properties by the owner name, APN, address, etc.

After locating the desired property's tax record, double click on the record to display the details.

If the property has a digitized tax map on record with the Assessors Office, you can view the map by clicking on the **Download Tax Map** link in the lower right corner of the Detail Report screen (if there is not a digitized tax map available the link will not appear). The map will then appear in a new window or tab.

For more detailed information on using reInsight tax records, please click on the **Help** button in the upper right corner of any screen inside the reInsight program. Here you will find **Training Videos, Quick Start Guide** and a complete **User Guide**.
